

Photovoltaic Inverters

Arntjen Solar GmbH – Your partner when it comes to Photovoltaics

Product Image	Product Description
 <p>20-year warranty*</p>	<p>Platinum string inverter (transformer)</p> <ul style="list-style-type: none"> • Transformer with an optimized degree of efficiency, a wide input voltage range and fast MPP tracking. • Use of monocrystalline, polycrystalline and thin-layer modules made possible by wide input voltage range • Large, backlit fully graphical display for easy, at-a-glance device operation • Convenient menu navigation including versatile graphical analysis functions • Integrated data logger for daily evaluation as well as weekly and annual reports • Device networking and data logger Internet access via RS485 interface • RS232 Interface for connecting external evaluation and visualization tools • Module field at inverter (DC inputs) protected by excess voltage limiter • Potential-free low-voltage contact for controlling external control indicators (e.g. warning light) • Integrated self-commutated inverter on board (three-phase ENS according to VDE 0126-1-1) • Five-year warranty (*20 years available on request)
 	<p>Platinum ViewMaster & WebMaster</p> <p>Thanks to its built-in graphical display, the PLATINUM ViewMaster offers a convenient way to view the entire PV installation from a central location - even remotely away from the installed site of the inverters.</p> <p>PLATINUM ViewMaster provides you with an at-a-glance view of the current supply output sum and the yield of all inverters.</p> <p>You can use the PLATINUM ViewMaster to graphically display the output and yield of every inverter over a certain period of time.</p> <p>Use the PLATINUM Webmaster and rest assured: your PV installation is in the best of hands.</p> <p>The Webmaster allows you to record detailed information on the individual inverters as well as of the entire installation and display this information on your PC, e.g. current output, daily, monthly or annual yields, configuration data, and much more.</p> <p>The PLATINUM Webmaster combined with a modem makes it even possible to check your photovoltaic installation from a remote location, e.g. from your office or your home.</p> <p>It is capable of detecting faults or yield deviations and reports them by e-mail or SMS to the address or cell phone number you specify. Depending on your phone connection, you can connect it to an analog, ISDN or GSM modem.</p>
<p>All warranty information is provided by the manufacturer. The manufacturer's warranties are passed on directly. Errors excepted - Last update 09.2007</p>	<p>The following is a selection of well-known manufacturers and suppliers. Products and availability available on request. Recommended dimensions and technical specifications without obligation</p>
